PROFESSIONAL SUMMARY

Cybersecurity-focused Computer Science student with hands-on experience building Python-based security tools, including a phishing detection system, a password-strength analyzer, and an encryption/decryption utility. Practical understanding of network security, vulnerability fundamentals, and defensive security concepts, reinforced by a virtual cybersecurity internship at DecodeLabs. Seeking an entry-level SOC Analyst or Cybersecurity Analyst role to apply this experience to real-world security operations and incident response.

TECHNICAL SKILLS

Security & Networking: Phishing Detection & Analysis, Social Engineering Awareness, Password Security & Entropy Analysis, Encryption & Decryption, Vulnerability Assessment Fundamentals, Incident Detection & Response, OWASP Top 10, CIA Triad, Authentication & Authorization, Firewalls, TCP/IP, DNS, HTTP/HTTPS, Wireshark

Programming & Tools: Python, C++, SQL, HTML/CSS/JavaScript (Basic), Flask, Git & GitHub, VS Code

Operating Systems: Linux, Windows

CERTIFICATIONS

- Introduction to Cybersecurity Awareness — HP LIFE, HP Foundation (2026)
- Cyber Security Virtual Internship Certificate — DecodeLabs (2026)

PROFESSIONAL EXPERIENCE

Cybersecurity Intern (Virtual) — DecodeLabs

Jul 2026 – Aug 2026

Remote

- Completed a one-month virtual cybersecurity internship covering hands-on security analysis tasks and defensive security concepts
- Developed and documented security-focused projects as internship deliverables
- Earned a certificate of completion and a letter of recommendation citing strong technical problem-solving and collaboration

PROJECTS

PhishGuard — Phishing Email Detection System (Python, Flask)

github.com/abdulrehman-at3/PhishGuard

- Built a phishing detection system that flags suspicious emails using contextual analysis rather than single-keyword matching
- Analyzed indicators including urgency cues, suspicious links, authentication-related language, and social-engineering patterns

CyberShield — Password Strength & Security Analyzer (Python)

github.com/abdulrehman-at3/CyberSecurity-Password-Strength-Checker

- Built an entropy-based password-strength analyzer scored across multiple security indicators
- Added detection for repeated characters, keyboard-pattern sequences, and leetspeak substitutions, with tailored security recommendations

Encrypto — Encryption/Decryption Tool (Python)

- Built a Python tool demonstrating core cryptography fundamentals through custom encryption and decryption routines

EDUCATION

BS Computer Science — University of Central Punjab (UCP)

Expected 2027

Relevant coursework: Cybersecurity, Computer Networks, Operating Systems, Database Systems, Data Structures & Algorithms, Artificial Intelligence

Bachelor's Degree in Computer Science

ADDITIONAL EXPERIENCE

Digital Marketing & Design (2021–2024) — Prior roles in digital marketing, graphics design, and social media management across multiple organizations; developed client communication, project management, and attention-to-detail skills.
